## INTRODUCTION

The general trend in cryptocurrency and blockchain technology has taken the finance sector by Storm. From the era of Central banking, commercial banking and other third-party affiliated financial institutions to the current trend in the centralised finance, the world has and is still undergoing changes that will shape the future in all aspects and not just the financial sector. The application of cryptocurrency even though not limited to the financial sector has seen many tremendous changes in this regard with each hurdle overcome, more milestones are yet to be uncovered so get to the full adoption which is the major goal that would Mark define actualizing it's full potential.

The integration of staking, farming, earning and cross-chain swapping in UCF Finance is a sure edge as the current industry problems have been weighed and put into consideration before the development of this project.

We aim to achieve unparalleled results in DeFi staking and Yield Farming without the rug pulling that leads to loss of liquidity as we strive to create a community dedicated to our development and sustainability.

## **OVERVIEW OF UCF FINANCE**

UCF Finance is a blockchain based community of crypto enthusiasts that leverage on the Binance Smart Chain network to deliver its innovative ideas and solutions to the crypto space.

We have adopted BSC for a number of reasons which includes low transaction costs, cross chain swapping, scalability and adaptability.

UCF is a progressive token based on Binance Smart Chain which rewards holders through different means included in its features.

## OUR CORE FEATURES

### **Farming:**

Yield farming is a new innovation introduced to increase value for farmers who deposit their tokens into our different liquidity pool and get LP reward for it.

UCF finance farming uses Smart contracts to allocate rewards based on the liquidity provided. Yield farming is one of the core advantages of decentralized Finance ( DeFi) where farmers compete for a chance to farm the best token. This method would be used to reward users who believe and trust in our strategy.

### **Staking:**

This involves holding funds in a cryptocurrency wallet to support the security and operations of a blockchain network. UCF finance offers the staking services where users can either keep their tokens in their wallets or in exchanges and earn staking rewards. All users have to do is to hold your UCF in a wallet or an exchange and earn rewards. Our staking mechanism works with a proof - of - stake POS which is cost effective and energy saving compared to mining that implements the proof - of - work (POW). This is a very robust mechanism to facilitate consensus in a decentralized manner

### **Earning:**

UC finance offers many different ways for holders and the community to earn our token. Farming and staking is one of the major ways our investors can earn passive income by raising a hand. Other tokens can be earned just by staking in the liquidity pool meant for each staked pair. UCF can be staked to earn in the UCF/BNB liquidity pool and so on. This gives investors and stakers a variety of pools to stake their tokens in.

The app feature that allows investors earn is known as crypto earn.

## **Swapping:**

UCF Finance will offer a swapping feature which will enable users to exchange UCF to other cryptocurrencies directly.

This Direct swap feature is also controlled by the smart contract. Pancakeswap will be used for easy, efficient and cost effective swapping of UCF into other Bepro tokens and vice versa.

UCF will be an independent but complementary system to the existing Binance Smart Chain network.

Multiple - chain architecture is used, with the idea being that users can scamheisly transfer assets from one blockchain to another. With this interoperability, users are exposed to a vast ecosystem that can cayor to a myriad of use cases.

## MARKETING STRATEGY:

### Partnership:

UCF Finance will partner with several financial institutions and blockchain companies to help promote its exchange globally.

### Airdrop and Bounty Campaigns:

Airdrop and bounty campaigns are some of the best marketing strategies for every crypto project. Free tokens will be given out all through.

### Blockchain Events:

As a global real estate platform, UCF Finance will host several blockchain summits in various continents of the world. These events will bring various crypto influencers together and thereby promote our services.

### Listing on Exchanges:

UCF Finance will be listed on major top volume exchanges. Our token and exchange will be listed on coinmarketcap, this is to enable our users to check on a regular price on exchanges, trade our tokens and as well know our rank on coinmarketcap.

### Word-of-Mouth:

In today's businesses, word of mouth is the most efficient marketing strategy. We will ensure our support offers 24/7 support to our customers and users of our exchange. This is to help us maintain a high level of customer satisfaction. When customers are satisfied they give positive reviews about the project and this sky-rockets the success of the project.

### Social Media Marketing:

Social media today is an efficient marketing strategy for every industry. UCF Finance will adopt all social media marketing strategies to market its exchange and services carried out. The platforms that will be used for paid ads include bing, google, Facebook, Instagram, Twitter, LinkedIn e.t.c

### Public Relation:

We will ensure effective public relations. PR articles will be released weekly on top cryptocurrency blogs like Cointelegraph, newsbtc, icobench e.t.c this is to help us publicize our project very well and get the public to know more about our unique strategy

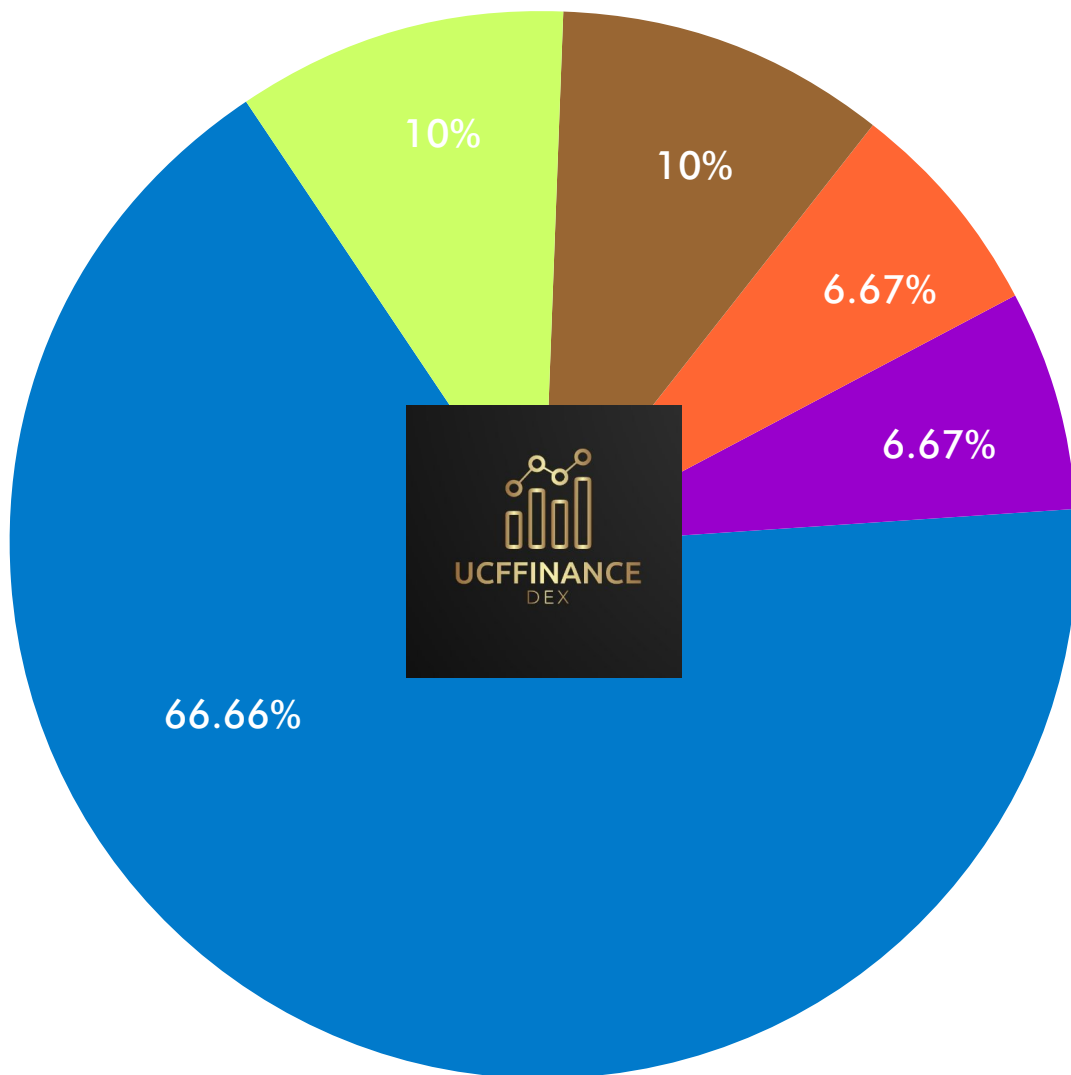

## TOKENOMICS

<b>Token Name:</b>	<b>UCF Finance</b>
<b>Token Symbol:</b>	<b>UCF</b>
<b>Total Supply:</b>	<b>100000</b>
<b>Token Type:</b>	<b>BEP20</b>
<b>Token Decimal:</b>	<b>18</b>

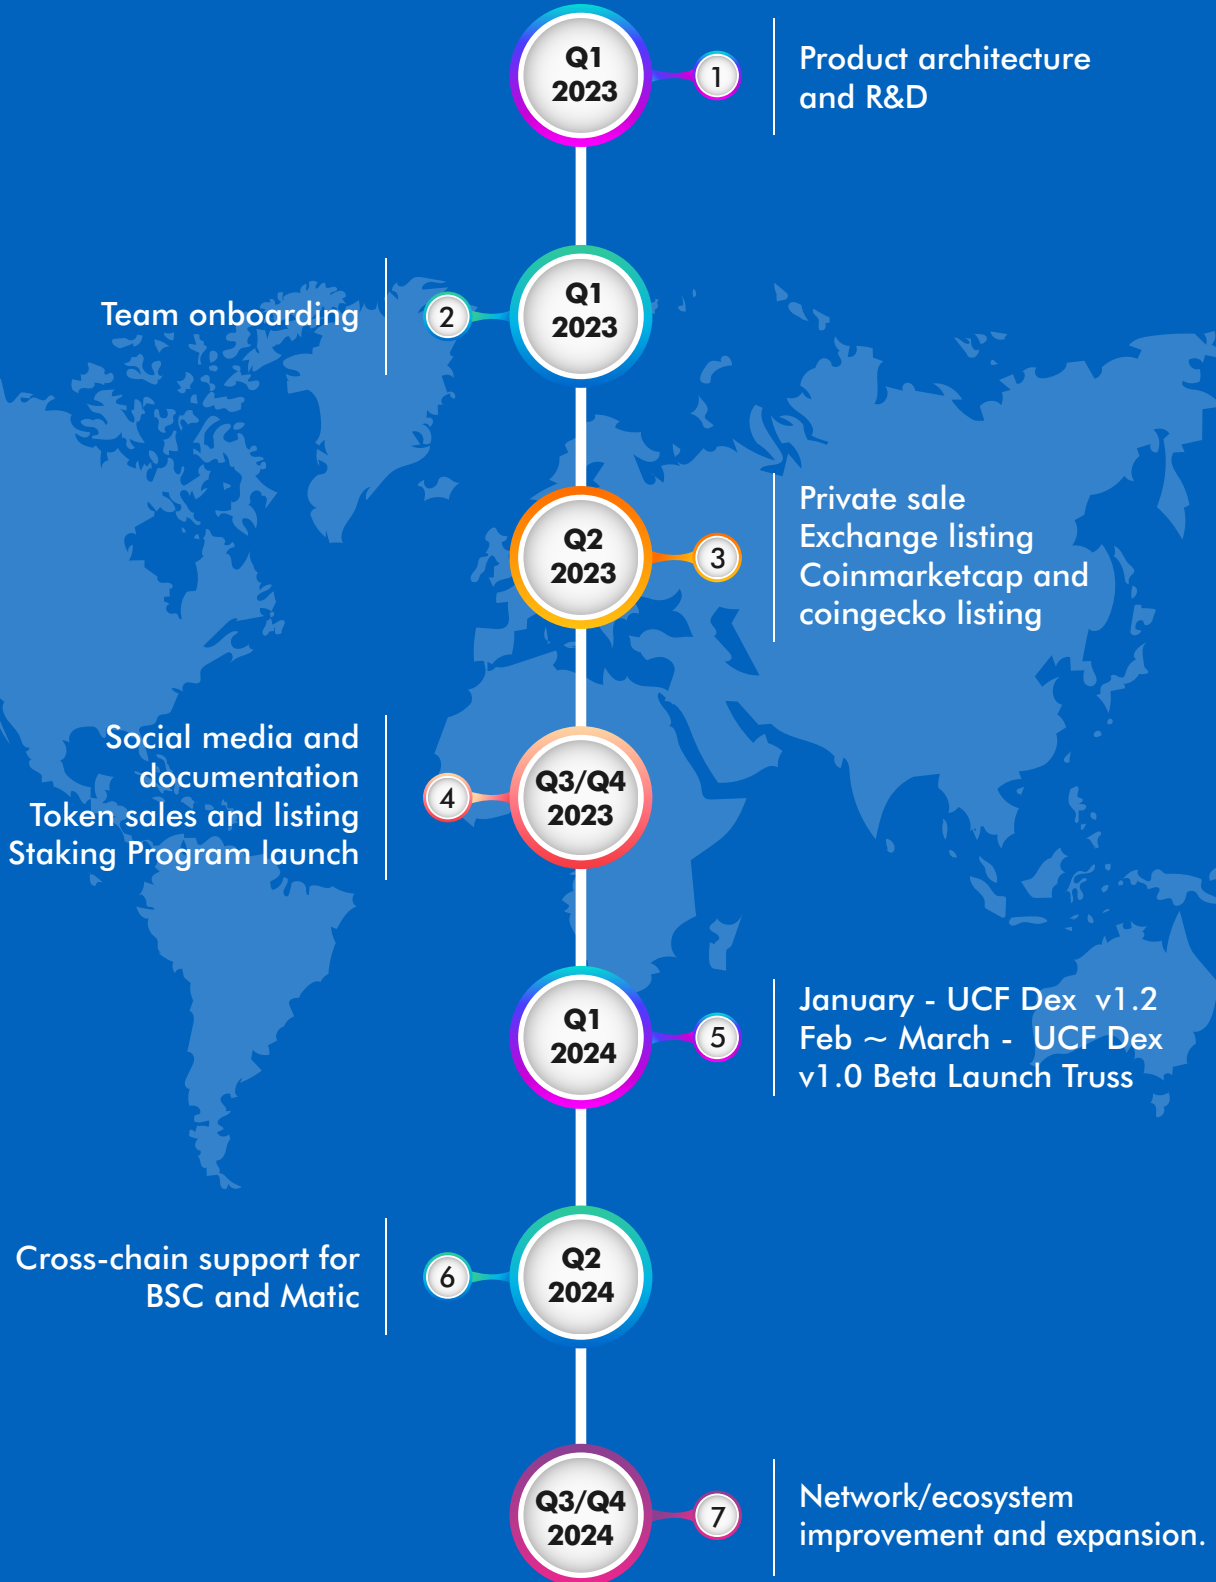

## TOKEN DISTRIBUTION

- Farming & Staking: 10000 (10%)
- Development: 10000 (10%)
- Listing: 6670 (6.67%)
- Team: 6670 (6.67%)
- Presale: 66660 (66.66%)

# ROADMAP

## ROADMAP

## HOW TO BUY UCF FINANCE ON PANCAKESWAP USING TRUST WALLET.

- Open your Trust Wallet, check your Trust Wallet if the Browser is visible between Wallet and DEX. If not, go to Safari and type `trust://browser_enable` to activate the DApps Browser. Click on Browser.
- Click on Pancakeswap
- Click on Connect (sometimes you are automatically connected, and sometimes you are not).
- Click on the gear and type in 11%.
- At the top, enter the number of BNB you want to convert to UCF.
- Below that field, click on Select a currency, paste `0xd87e6f186418a7e5b5ad84d236fb75738a852ca9`
- Click on Swap.
- You have now successfully bought UCF.
